Summary

Founding Engineer at Hyfin, building GAIA, an AI platform that gives lenders in emerging markets the data infrastructure and risk tooling to underwrite clean energy loans (EVs, solar) without decades of historical track record. Formerly Senior Software Engineer at DraftKings and a Stanford MS researcher applying NLP and psychometrics to LLM evaluation and AI safety.

Experience

Hyfin — Founding Engineer [start month/year] – Present
Building GAIA: an AI platform synthesizing asset performance, borrower signals, and market conditions into underwriting intelligence for clean energy lenders across South & Southeast Asia and Sub-Saharan Africa.

DraftKings — Senior Software Engineer, Financial Platform [start] – [end]
Built large-scale production systems serving millions of users every minute.

Amazon — AI/ML [start] – [end]
[Fill in team/role/one-line summary]

Education

Stanford University — M.S. Computer Science, Applied AI/ML [start] – Present
Computational Psychology & Well-Being Lab, advised by Prof. Johannes Eichstaedt.

University of Minnesota — B.S. Computer Science, *Summa Cum Laude* 2021

Research & Citations

134 citations · 5 h-index · 4 i10-index (Google Scholar, updated automatically)

Research on LLM evaluation, applied NLP for psychology and social science, and AI safety, spanning PNAS Nexus, Nature Digital Medicine, and other venues. Coverage in *WIRED*: “Chatbots, Like the Rest of Us, Just Want to Be Loved.”
